

# Alive And In Love

Lookin' at life in a different light  
I took what's wrong and I made it all right  
Out of the darkness and uncertainty  
Into the arms that rescued me

'Til you came along, I was half alive  
Another lost soul who barely survived  
Searchin' for love where love could not be found  
I'd build my dreams then knock them down

(chorus)  
Now it feels like I'm breathing for the very first time  
I'm finally feeling what was mine and always mine  
Thought I was dying and I'd had enough  
But thanks to you baby I'm alive and in love

Life's full of lessons and the biggest one is love  
You're my salvation like a gift from up above  
I don't always know why you believe in me  
The glow in your eyes is the only thing I see

The oceans are full from all the tears I've cried  
The touch of your hand heals the hurt inside  
When I wake up each morning I remember this  
You saved my life with just one kiss

(repeat chorus)
