

# Smile

She dropped out of school when she was 15  
Said it held her back, she didn't think that it was cool  
Lived with a guy twice her age  
His love was written all over her face in black and blue

She skipped town, started messin' around with the wrong kind of crowd  
Tryin' to turn it around, but she had no luck  
Started takin' drugs and money for love  
Fightin' off thugs and sleepin' with bugs  
Yeah she messed up

(chorus)

What do you do with an angel who's got a little mud on their wings  
What do you do with a song when nobody sings  
When you got no pride and you got no friends  
Who's gonna love you when you get to the end  
If you feel like cryin' all you gotta do is smile

Graduated college and got his degree  
Studying law down at USC, rolling in the dough  
Head of his class, top of his game  
Kickin' ass and takin' names, star of the show

Big business man, he was makin' plans  
Talking 'bout the stock market, shakin' hands but something's wrong  
Finally realized when he opened his eyes  
That everything he knew was all just lies  
And he was alone

(repeat chorus)

Where you gonna turn when your bridges are burned  
Don't be concerned it's a lesson learned  
You gotta stay in the fight  
Get up off the ground, the world goes 'round  
So turn that frown right upside down it's gonna be alright

(repeat chorus)
