

# Christmas Eve

I won't forget the night we met  
The moonlit ice was neon wet  
An all night's dance with free champagne  
From different sides of town we came  
In a sea of strangers you appeared  
Like a ruby in an angel's ear  
Out of sync with festive cheer  
And overcome by an old familiar fear

(chorus)

That's when you reached down deep inside of me  
The night grew silent instantly  
All was come beyond belief  
We fell in love on Christmas Eve

I watch you trim the tree tonight  
Another Christmas Eve of white  
Chestnuts on an open flame  
Thankin' Santa for the way you came  
The lonely hearts and shattered minds  
Look for a love they'll never find  
I was half a man stuck in the snow  
Until we kissed beneath the mistletoe

(repeat chorus)

Lonely hearts and shattered minds  
Look for a love they'll never find  
I was half a man stuck in the snow  
Until we kissed beneath the mistletoe

(repeat chorus)
