

# Everybody's Baby

The life of the party is all partied out  
The girl so sure is now full of doubt  
Some sink to the bottom you rose to the top  
The higher you are the harder you drop

You're new leading men look nervous tonight  
Will they remember their lines when you turn out the lights  
And it's baby this, baby that  
Should I kneel at your feet should I tip my hat

(chorus)

You're everybody's baby  
Toast of the town  
Number one lady  
You wear the crown  
You still miss my loving  
And the way we were  
You're everybody's baby  
But nobody's girl

The party's over, no one's ready to leave  
There's your circle of friends and then there's me  
Flashback to the nights on Hilltop lane  
Car breakin' down makin' love in the rain

You were too hot to handle, I was too young to care  
You were goin' places I was goin' nowhere  
Who's there to hold you when your spirits fall  
I'm the only one that you would ever call

(repeat chorus)

They say it's the loneliest was up at the top  
But once you start climbin' it's hard to stop  
Too much applause can go to your head  
You need to be kissed and tucked into bed
