

Lost And Found

All the colors of the ocean
Melting as they touch the sand
Wash away forgotten traces
Of the places that we've been

Our time is short, don't waste a moment
No turning back once we began
Open your mind, feel the passion
We've got to dance all that we can

(chorus)

Because the world is like a disco ball
With spinning lights around us all
Blinded by the moment that we're in
Static noise drowns out the sound
As we search through the lost and found
To find ourselves and start over again
Do,do,do,do

Everybody has a story
It's all we have in the end
Every day another chapter
Until the blanks are all filled in

Some break your heart, some save your soul
Some make our pieces fall apart
Look away from your reflection
It's the only way to find out who the hell we are

(repeat chorus)

Our time is short, don't waste a moment
No turning back once we began
Open your mind, feel the passion
We've got to dance all that we can

(repeat chorus)
