

Nothing Has Changed

What became of "what's his name"
It didn't work out, well that's a shame
The plans you made blew up in your face
Leavin' your heart with a bitter taste

What about me, how have I been?
Thought I would sink but I learned how to swim
Gave up on her when you let go of him
Runnin' in circles and we lost the spin

(chorus)

Everything's different but nothing has changed
Love always leaves an invisible stain
Fighting fire with fire, fanning the flames
Dreams are all gone but the passion remains
Everything's different but nothing has changed

We all search for a love that's true
We're gettin' older, so what else is new
Act like children our whole lives through
But I cried like a baby when I lost you (Boo hoo)

Tonight they're playin' a different song
Somebody still doin' somebody wrong
Young dreamers keep singin' along
But the ghost of love keeps lingerin' on

(repeat chorus)

(bridge)

Rewind, rewind, you know I gotta find a time machine
Go back to the time when we were so much in love, wild and free
Who am I, who are you? I don't recognize what we've become
Feel dumb, must insist, can't make sense of any of this

What's that you say? How have I been?
Thought I would sink but I learned how to swim
Gave up on her when you let go of him
Runnin' in circles and we lost the spin
