

One

I dove my hands into the ocean
Splashed the morning on to me
Unwound the world of springs
That anchored me to where and when to be

I threw it out into the open
Let the time drift out to sea
I watch the waters calm
So my reflection smiles back up at me

(chorus)

We try to change the world
The change is right on cue
I'll smile a little bigger
What else is there to do
We've got to love ourselves
If we want the love to come
To change a million
We must start with one

Up from the heavens shines a green light
On a maze that's paved in gold
Strangers around me try to
Climb the walls to find which way to go

What if the place that we're all headed
Is one that we've already known
Waiting inside us
All we've got to do is stop and say hello

(repeat chorus)
