

What Love Is All About

I was looking at a photograph
I found of you and me
When a thought crossed my mind
I must've been blind
'Cause I'm just now beginnin' to see
After all this time
I must admit I had my doubts
When I held you in my arms
Your smile cleared all the clouds
Baby I know
This must be what love is all about

(chorus)
I have never felt like this before
I didn't know it until now
I can't describe the way you touch my soul
This must be what love is all about

I might not be the perfect guy
And I know I'm not so smart
I can't afford a diamond ring
But what I can give you is my heart
You can put your trust in me
I'll never let you down
You bring out the best in me
Whenever you're around
Baby I know
This must be what love is all about

(repeat chorus)
