

Gray

All the focus on black and white
Makes it hard to see the gray
If we're ever gonna stop the fight
We must look it in the face
It's been a long road of lost souls
With more everyday
When will we ever see change

(chorus)

We would stop all the hate
And live with love in its place
If all the colors could fade to gray

Everybody's tryin' to criticize
Workin' hard to separate
Blood is runnin' through the picket lines
When love is what it's gonna take
It's been the same song for too long
We're tired and afraid
Where's all our heros today

(repeat chorus)

Now's the time to stand up
And be heard
We can't keep punishin'
For the color of our skin
'Til mankind is colorblind
Nobody wins

(chorus)

We would stop all the hate
And live with love in its place
If all the colors would fade
Fade so beautifully to gray
