

Angel In Disguise

The moment that I saw you, and my eyes met yours
It seemed the stars all told me you'd be my world and more
Every day together, hours we would spend
Side by side just me and my best friend

My favorite face to greet me whenever I'd come home
I'd hold you close inside my arms and never feel alone
Kisses on those sweet cheeks and buttered popcorn paws
I dream about them ever since you've gone

(chorus)

And even through the tears I cry
I still feel you by my side
I thought I saved your life but you saved mine
You were an angel, an angel in disguise

I keep your picture with me, your favorite toys I've saved
Find comfort in that blanket that kept you warm and safe
Your sweet sounds were the soundtrack to all my days and nights
The love you taught forever changed my life

(repeat chorus)

If only I could hold you close just one more time
Would you tell me it's the most on the other side

I brought home a new puppy, she would've loved you so
I introduce the two of you each time there's a rainbow
I'll miss your furry kisses and how we hate goodbyes
I always knew, I saw it in your eyes
You were an angel in disguise
