

It's Always Been You

Who wakes me up with fresh coffee in my cup
It's always been you
And who's the one that always gets the tough work done
It's always been you
When you're not around I'm lost of what to do
When it comes to what I need I know exactly who
Got my mind set that even long before we met
It's always been you
Ooh, ooh

Who makes me feel like I'm not crazy and alone
It's always been you
Who's the one to always make this house feel like a home
It's always been you
When I'm by myself I'm lost inside my mind
The place that I feel safest is with you here by my side
Got my mind set that even long before we met
It's always been you

(chorus)
Something felt just wrong
'Til you came along
I only feel like me with you

Who's got the face to make me smile so many ways
It's always been you
Who shows forgiveness, loves me for all my mistakes
It's always been you
You make me better and you taught me how to love
You're who I'll always need, you make me feel enough
Got my mind set that even long before we met
It's always been you

(repeat chorus)

Ooh, ooh
