Red

You've gone and stepped out of line, took it too far this time
You know that this means war
Not seein' anyway out, you got my world spinnin' 'round
And I can't take anymore
Chemicals in the air, we're stuck in this nightmare
Everyone hit the floor
Why'd you have to go and fuck this up, I'm gonna give you what you're askin' for

(Chorus)
My heads goin' blind, we're on the front line
You didn't have to leave me for dead
The tears that I shed and the blood that I bled
Has got me seein' red
G-G-G-G-G-G, get out

If I were you I would run, run away from my guns
I'm gonna let the bullets fly
Atom bombs fallin' down, they're blowin' holes in the ground
Mushroom cloud in the sky
So, is this what you want, it's not what you thought
Couldn't you see the signs
The pandemonium won't leave us alone, yeah, now it's time to say goodbye

(repeat chorus)

Run, yeah you better start to run
Run, yeah you better start to run
Yeah, yeah, yeah

Reinforcements arrive, they see who's still alive
And bring this all to an end
The battleground is on fire, all the flames burnin' higher
I can't believe we were friends
Now there's no turnin' back after this attack
There's nothin' left to mend
Our history has all been lost until we meet again
