

Take It Away

That pretty girl that makes me lose my mind
Is the same girl that's got me terrified
And the only thing that keeps me feelin' fine
Is the same mistake that I've made thousands of times

CH)

Nothin' means nothin' if you're goin' away
I'll think of somethin' just to make you stay
It's getting' hard to find the right thing to say
You give it to me just to take it away

With every blink I see your shadow get small
And tryin' to chase you don't do no good at all
You cut me down and I feel three feet tall
The silent treatment while I get down and crawl

(Repeat chorus)

Give it to me, give it to me
Give it to me, give it to me
Give it to me, give it to me

Don't you be a tease
Girl I beg you please
You got me down on my knees
