Another Silent Night

Santa where'd you go Haven't seen you in years You passed by me so many times now it's not fair I knew that I'd get older Didn't know that would mean You would join the list of friends I no longer see All this fuss over the holiday But a party for one just doesn't feel the same

(chorus) Here I am, all alone Hiding inside from the cold I feel so blue in all this red and green It's just a sad reminder for me The world outside gathers loud and bright But from where I sit It's just another silent night

No need for lots of gifts In a big empty place But when it's just you, oh, the money you save Of course, I tend to wonder what it'd be like with company But with no one comin' over there's no need for a tree All is calm when there ain't no one around But in these four walls silence is the only sound

(repeat chorus)

Even the season can't hide Or fill up what's empty inside That is why Christmas time's just a day gone by

(repeat chorus)

All this fuss over the holiday But a party for one just doesn't feel the same The world outside gathers loud and bright But from where I sit It's just another silent night
