

# Christmas Star

In the sky all the stars they shined so bright  
And they sparkled through and through  
But only one made a glorious dream come true

Now this very star would become known  
For its light and its stories told  
If it hadn't of shined, the world would be quiet and cold

(chorus)  
Christmas star, oh Christmas star  
Guiding from the north  
Your bright flame brought a fame  
Like never before

That special star was burning bright  
On a cold, dark winter night  
It led three kings to follow in its radiant light

(repeat chorus)

Then a little child was born beneath  
A child that the world would know  
And the light he'd bring would make the other stars all glow  
(Light he'd bring would make the other stars)  
Oh, now every year we send our praises from below
