

Infinity

They say foreve're a long, long time
But that's how long I wantcha to be mine
Oh girl, it's me and you against the world
All the stars in the sky tonight
Can't compare to the light in your eyes
It's true, yeah it all revolves 'round you
You know that I would walk a thousand miles
Just to see you smile

(chorus)

Every hour, every day
Everywhere and every way
You're the one I adore
No, I couldn't want you more
From the moon to the sun
Until my days are done
I love you times infinity plus one
Plus one

My love is bigger than the universe
Felt it all when I kissed you for the first time baby
No more waitin' for a sign
Not this time
It's like I'm floatin' up in outer space
Every time I see your face

(repeat chorus)

(bridge)

My eyes are open and I finally see
There is no place that I'd rather be
Baby, you and me

(repeat chorus 2x)

Plus one
Plus one
Plus one
