

Together

What make you think that I can lead the way
Is it the confidence I speak or the money I get paid
And what makes you think that I know who I am
Is it the way I fake a smile, am I worth it in the end

I don't know if I can be much help
I barely know what I should do myself
All I can do is promise to be here for you
And tell the truths I've felt

(chorus)
Let me be by your side
We'll be each other's guide
No need to follow, come hold my hand
We'll do this together
'Cause you're my best friend
I want to be near you
Hang on your every move
Sometimes the paths are hard that we choose
And we'll have to walk in each other's shoes
So let's do this together

I'm not so sure that I know which road's best
I can only take a chance, close my eyes and hold my breath
Wherever we go, you know you can count on me
And I need to count on you anywhere that we may be

(repeat chorus)

I don't know if I can be much help
I barely know what I should do myself
All I can do is promise to be here for you
And tell the truths I've felt

(repeat chorus)
